Date Sunday, July 5th, 2026 at 10:39 AM

On July 4, 2026, at approximately 7:53 PM during the July 4th party, a guest fell on the staircase. She stated that she was not injured.

Marty responded to the incident immediately and spoke with the guest. She got up on her own and continued to enjoy the party. Several people asked her if she was ok. She said that she was. Marty also assisted several members who appeared to have mobility limitations, including individuals using canes, as they navigated the stairs.

The weather deteriorated rapidly, and a large number of people entered the clubhouse almost simultaneously to seek shelter from a torrential downpour. As a result, the stairs became wet. Following the incident, Bill Distler wiped down the stairs with paper towels to help remove the moisture.

The following link contains the video of the incident, along with related video footage recorded around the time the event occurred.
